Subject: LaSalle AST - Acceptance Review

Alison,

This e-mail is to inform Exelon that the NRC has formally accepted the **Request for License Amendment Regarding Application of Alternative Source Term**, dated October 23, 2008, for review (ADAMS Accession No. ML083100149). The NRC reviewers have found the submittal dated October 23, 2008 acceptable for review under LIC-109. However, this acceptance does not necessarily mean the NRC staff will not need additional information, once we get involved with the review.

Stephen Sands
