

Species of Turtles Found in New York

New York State Amphibian and Reptile Atlas Project

Herp Atlas Logo

*** Important ***

The maps on this page reflect the current distribution of species based upon data collected for the Atlas through 1998. Data from the Atlas should be carefully considered before it is used for environmental review purposes. The data collection phase ended on December 31, 1999. The most recent data are not reflected in these interim maps. These data will be made available after review and analysis. Some reports may be removed during the final quality review prior to publication of the Atlas. Each colored block represents one 1:24,000 scale or 7.5' topographic quadrangle. There are 979 atlas blocks (topographic quadrangles) in the state. These maps range in size from 8-13KB each.

Turtles of New York

Common Name	Scientific Name
Common Snapping Turtle	<i>Chelydra s. serpentina</i>
Common Musk Turtle	<i>Sternotherus odoratus</i>
Eastern Mud Turtle - Fact Sheet	<i>Kinosternon s. subrubrum</i>
Spotted Turtle - Fact Sheet	<i>Clemmys guttata</i>
Bog Turtle - Fact Sheet	<i>Clemmys muhlenbergii</i>
Wood Turtle	<i>Clemmys insculpta</i>
Eastern Box Turtle	<i>Terrapene c. carolina</i>
Northern Diamondback Terrapin	<i>Malaclemys t. terrapin</i>
Eastern Redbelly Turtle	<i>Pseudemys rubriventris</i>
Common Map Turtle	<i>Graptemys geographica</i>
Yellowbelly Slider	<i>Trachemys s. scripta</i>
Red-eared Slider	<i>Trachemys scripta elegans</i>

Painted Turtle	<i>Chrysemys picta</i>
Blanding's Turtle - Fact Sheet	<i>Emydoidea blandingii</i>
Green Turtle - Fact Sheet	<i>Chelonia mydas</i>
Atlantic Hawksbill - Fact Sheet	<i>Eretmochelys i. imbricata</i>
Loggerhead - Fact Sheet	<i>Caretta caretta</i>
Atlantic Ridley - Fact Sheet	<i>Lepidochelys kempii</i>
Leatherback - Fact Sheet	<i>Dermochelys coriacea</i>
Eastern Spiny Softshell	<i>Apalone s. spinifera</i>
