Sarah--

I would like copies of the parts of the book dealing with earthquake ground motion: section 2.0 and commentary c2.0. The other seismologists on the review team, Steve Hartzell and Yuehua Zeng, might also want copies. It would be great if you could make a pdf file of the relevant sections.

Thanks.

I have a hard copy of the ASCE reference. Should I copy the relevant sections of that report and send them to you? I will check to see whether the NRC library has it.

Tony ... by copy of this email note to Sarah, I am trying to determine what she may know about availability of these materials - and she or I will get back to you and David as soon as possible.

Cheerz,
-g-

Gerry,

Dave Boore, one of the USGS seismologists reviewing the Summer COLA sent me an e-mail requesting copies of several references; I copied you on my response to Dave.

I was able to locate all but the following two references on-line. Is there a way that we can acquire these references for Dave without a huge amount of difficulty?

Tony
