Hello Irene, As for the POO, we have a copy of the application which we got from DEQ. Here are copies of the MOA and some description of and a question from our Archeologist. I have cc'd him so you can respond to him directly.

I've attached the Savageton 3 and 4 MOA, which was the most recent (Dry Willow I was the first). I would caution this person that the impacts from CBM development are different, so there will be different concerns from the uranium locations. I would also point out that the mitigation measures defined in the MOA are in place to lessen the impact to the setting of the Buttes (i.e. visual impacts).

Also, it is my understanding that the Nichols Ranch Unit (of the Nichols Ranch Project) is entirely split estate and outside our jurisdiction. Additionally, it is also several miles away from the Buttes and outside our area of applied mitigation. The Hank In-situ Unit of the Nichols Ranch Project is the one on the side of the Butte and of immediate concern. Is she in charge of the whole project and did she take it over from Ron Linton?
