Mr. Lawrence G. Burman
Manager, Atomic Energy Development
Engelhard Industries, Inc.
113 Astor Street
Newark 2, New Jersey

AMENDMENT OF "LICENSING OF PRODUCTION AND UTILIZATION FACILITIES,
10 CFR 50

Dear Mr. Burman:

Reference is made to your application for exemption from 10 CFR
50 dated January 5, 1961.

Enclosed is a copy of an amendment to the Commission's regu-
lation "Licensing of Production and Utilization Facilities",
10 CFR 50 which has been filed with the Office of the Federal
Register. Enclosed also is a copy of "AEC Analysis of Appropriate
Limits for Exemption".

The amendment is intended to exempt the processing of slightly
irradiated uranium from the licensing requirements of Part 50.
Such processing, however, will still be subject to the requirements
of Part 30 "Licensing of Byproduct Material" and Part 70 "Special
Nuclear Material".

Upon the basis of the information furnished in your application for
exemption, the content of fission product and level of activity
of the 24 slightly irradiated fuel and control elements being
returned by the Netherlands Government fall within the limits
prescribed in the enclosed amendment to Part 50.

Under separate cover we are transmitting an appropriate revision
of License SMP-98 under which the Netherlands elements may be
processed.

Very truly yours,

R. Lowenstein, Acting

Director, Division of Licensing and
Regulation
