DEC 6 1962

Engelhard Industries, Inc.
113 Astor Street
Newark, New Jersey

Attention: Mr. Lawrence C. Burman
Manager, Atomic Energy Development

Gentlemen:

Reference is made to the "Certification of Status of Special Nuclear Material Activities Under United States Atomic Energy Commission License Number SM-98" dated November 30, 1962, by which you advise that all special nuclear materials procured and/or possessed under License SM-98 have been or will be disposed of in compliance with 10 CFR 20 prior to December 31, 1962. Reference is also made to our letter of June 18, 1962, requesting that at least fifteen days prior to vacating the facility, or to using it for any purpose other than authorized under your license, or prior to December 15, 1962, whichever is earliest, you submit to us a report indicating the levels of fixed and removable contamination existing in the facilities.

Consideration may be given to cancellation of License SM-98 on receipt of your report of contamination levels. Please note that pipes, columns, ducts or other areas difficult to survey for built up contamination must be treated as containing special nuclear material and should be disposed of prior to termination of the special nuclear material license. Further, if you are unable to provide the report by December 15, 1962, you should request temporary renewal of SM-185 to authorize your continued possession of the special nuclear material present as contamination.

Very truly yours,

Distribution:

Compliance Hdqrs (2) w/cy certification of status 11/30/62
