Source and Special Nuclear Materials Branch
Division of Licensing and Regulation
ENGELHARD INDUSTRIES, INC., REQUEST FOR INSPECTION

JUL 1 - 1963

LR:JJL

70-139
40-768

Due to the termination of nuclear activities, the subject licensee requests cancellation of Licenses SNM-185 and SUB-172. By letter and enclosures dated June 27, 1963, the licensee has submitted a listing of current fixed and removable contamination which exist in their former nuclear facility (copy enclosed).

It is requested that the Division of Compliance conduct a close-out inspection of the subject facility to confirm that the levels of contamination are within the values set forth in our letter dated August 15, 1962, to the licensee. When we receive such confirmation we will take steps to terminate the licenses.

Enclosure:
2 Co cys incoming
