

Docket 70-90  
SNM-14

Draft  
Beck:cse  
1/16/59

Mr. E. F. Rosenblatt  
Senior Vice-President and  
Director of Research  
Engelhard Industries, Inc.  
113 Astor Street  
Newark 2, N. J.

Dear Mr. Rosenblatt:

The general description of your proposed radiation monitoring and alarm system and emergency procedures to be followed in case of a radiation incident appears to be satisfactory. We cannot, of course, decide in detail until you have decided on the type of instruments, where they will be located in the processing areas, and the detailed procedures by which they will be maintained and used.

We suggest that you develop your plan and let us know as soon as possible how quickly you expect to have it in operation.

Sincerely,

H. L. P.
