

Letter of Opposition

11

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

> Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

Petition

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

>Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

>The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

>Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

>Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

>Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

>In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

Petition

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

>Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

>The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

>Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

>Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

>Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

>In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

Letter of Opposition

(22)

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

> Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

Letter of Opposition

22

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

> Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

Letter of Opposition

18

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

> Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.

Letter of Opposition

12

We, the undersigned, are opposed to the Progress Energy railroad line being placed along the old abandoned railroad bed at the south end of The Villages of Rainbow Springs.

> Having trains cross Highway 41 may block emergency vehicles from homes and medical facilities, making it less safe for all residents in Dunnellon, Rainbow Springs and all adjoining areas.

> The already-heavy traffic on Highway 41 will become worse with a second Dunnellon railroad crossing and the resulting train delays.

> Due to additional trains on the present line, rail noise will increase for all areas of Rainbow Springs, including Grand Park, Grand Park North, Country Club Estates, The Forest, The Villas, Fox Trace, The Woodlands, and Fairway Estates, as well as the surrounding area.

> Some Woodlands property owners will have trains operating along the edges of their yards, in close proximity to their homes, and would threaten their tranquility.

> Property owners will lose part of the investment they have made in their homes as property values drop and homes become more difficult to sell.

> In spite of assurances from Progress Energy, residents are concerned about the possible future transportation of hazardous materials and nuclear waste through their neighborhoods. This danger would obviously pose significant pollution and health hazards.

We feel the railroad spur in its proposed location will have an irreversible negative impact on our environment, on our property values and on the quality of our lives.
