Subject: my feelings about the proposed niclear plant in my state

There are many very vapid reasons that I do not want this to go through. The very first is when are we going to get a lottle sense and quit spending so much money??? Of there is an affordable way and one that eventually we MAY recoup the expenses then common sense says that going the more affordable way would make financial sense.

We have done enough damage to our environment and the animals. The hotter water released by this plant would increase not lessen our diasterous impact there.

If there is an accident or meltdown the # of fatalities and injuries are absolutely unacceptable for those who live in this state.

It would make much more common sense, be more affordable, present less hazard to us and the environment or animals if we developed renewable energy.

Of course if we did that the rich guys would not get richer by rapeing and endangering peiople and the environment!!! Actually it would eventually work for these things not against them! Terrorism and sabatoge would be much less likely with renewable energy.

Please, register my vote and voice against this dangerous way of getting the rich guys even richer.
