Carla,

Attached is a copy of the signed letter sent by the Marion County Building Industry Association to the NRC recommending approval of the COL.

Looking forward to this project moving along.

Kind regards,

Dave Harden

RE: Progress Energy Florida – Levy County Nuclear Plant, COL

Dear Mr. Canova:

This letter is written in support and hopeful approval of your agency's consideration of the Progress Energy Florida (PEF) application for a *Combined Construction and Operating License (COL)* for its planned nuclear power plant in Levy County, Florida.

We have followed with great interest the steady progression of PEF in pursuit of their proposed electrical generating facility, which when completed will:

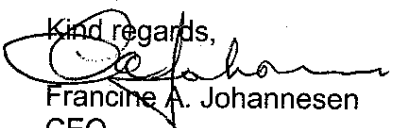

1. Provide electricity to meet the demands of continued growth in the region, for customers of Progress Energy and other utilities.
2. Ensure more flexibility and a backup system for providing critical energy to the area.
3. Maintain a robust system for supplying and delivering electricity to ensure the continued economic prosperity of the region.

We concur with the PEF philosophy that – *"electricity is far too important to risk service interruptions or problems with power quality due to inadequate equipment"*.

We applaud Progress Energy for its continued efforts to work cooperatively with regulators, community leaders, and other stakeholders in Florida to ensure the company makes the best long-term decisions to meet Florida's future energy needs. Nuclear power will prove to be our state's best option to provide reliable, affordable and emission-free energy.

As the leading voice of the construction industry in Marion County, and on behalf of our more than 400 members and their subscribing employees, families and associates of our trade association, we urge the NRC to approve Progress Energy's application for a *Combined Construction and Operating License (COL)* for the planned Levy County project.

Kind regards,

Francine A. Johannesen
CEO
