**BELL BEND NUCLEAR POWER PLANT
SUPPLEMENTAL INFORMATION FOR THE BELL BEND COLA
PART 5: EMERGENCY PLAN
BNP-2008-009 NRC Project #762**

- References:
- 1) BNP-2008-002, T. L. Harpster (PPL Bell Bend, LLC) to U. S. Nuclear Regulatory Commission, "Application for Combined License for the Bell Bend Nuclear Power Plant," dated October 10, 2008
 - 2) BNP-2008-007, T. L. Harpster (PPL Bell Bend, LLC) to U.S. Nuclear Regulatory Commission, "Supplemental Information for the Bell Bend COLA Part 5: Emergency Plan", dated December 1, 2008

PPL Bell Bend, LLC (PPL) submitted an application for a combined license (COL) for the Bell Bend Nuclear Power Plant (BBNPP) on October 10, 2008 (Reference 1). In a telecon held on November 26, 2008, the NRC staff requested that PPL provide additional information in support of the Federal Emergency Management Agency (FEMA) review of the BBNPP Emergency Plan. PPL submitted a supplement to the COL on December 1, 2008, to address a portion of the information request (Reference 2).

The purpose of this supplement is to provide additional information in support of the FEMA review. This information is provided in the attached binder and is organized so that it is aligned with the request that the NRC staff received from FEMA dated November 20, 2008.

PPL has enclosed most of the requested information. However, for various reasons as specified in the attachments, a small number of the requested items have not yet been obtained. PPL will continue to pursue closure of the remaining items, but we believe that the attached material, coupled with previously submitted State and Risk County Governmental Agency Emergency Plan Certification Documentation, demonstrates the efficacy of the BBNPP Emergency Plan as well as the significant level of commitment to provide emergency support should BBNPP be built.

AX45
MRO

The NRC staff made a separate inquiry regarding a statement in the BBNPP Emergency Plan that "the Pennsylvania Plan has received 44 CFR 350 unconditional approvals from FEMA for all nuclear generating plant(s) within the state boundaries." This statement is being corrected to indicate that "the Pennsylvania Emergency Response and Preparedness Plan, site-specific to the Susquehanna Steam Electric Station, has been formally approved by FEMA in accordance with title 44 CFR, Part 350."

PPL will appropriately incorporate the attachments to this letter and the above correction in a future revision to the BBNPP combined license application.

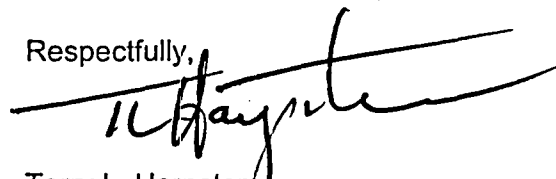

PPL requests that the NRC staff maintain the current application review and acceptance timetable that provides for docketing of this application by December 15, 2008. Please note that this material is being provided under separate cover directly to FEMA in order to expedite their receipt and subsequent review.

If you have any questions or require additional information, please contact Mr. Rocky Sgarro, Manager-Nuclear Regulatory Affairs at 570.802.8102.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on December 08, 2008.

Respectfully,

Terry L. Harpster
