RE: License No. 45-25221-01MD – Control number 142856

Clarifications - to questions posed by Dennis Lawyer & Betsy Ullrich In regards to IBA's about Amendment Request to Add Accelerator RAM and Reorganize RAM table

Dennis Lawyer

Per your phone conversation this morning with Jim Kostka my assistant, as to clarifications on our submitted answers for questions 1-10 - please know that:

- 1) It is understood that *Activation Products* – will not be added to the current RAM license - but will wait for the issuance of the second RAM license – later in year 2009 – that RAM license being specific to the Accelerator in KC MO.
- 2) That the removal of authorized use 9.F. and 9.G – affects ALL four NRC licensed sites.
- 3) That the Dose Container Evaluation statement – " IBA Molecular reserves the right to change our pigs to different materials and shield thickness based on changing technology/information " – should includes " and or equivalent " – the implication being that if *materials, thickness or technology change* – the dose rate to the client from the dose pigs – will be the same or less then - the stated dose rates in the Dose Container Evaluation table in the letter dated December 10, 2008.

Thank you
