SUBJECT

Follow-Up to film badge reading of 1000 rads

SUMMARY

The inspector asked for an update on the licensee's follow up of a 1000 rads film badge reading.

The RSO stated that the individual's blood test results were negative. The RSO is in the process of reviewing DRD and survey records for the time in question as a means of determining the individual's actual radiation dose for the record. Landauer plans to do another independent assessment of the badge reading. The RSO is in the process of learning how the badge received a much higher dose than the individual who should have worn the badge while conducting radiography. The RSO plans to complete his follow up of this issue by the end of this week. The RSO also plans to provide John Madera with a copy of the results of his follow up on the issue.

ACTION REQUIRED

Place in ADAMS.
