Loren,

I could not immediately find my RSD training certificate at our office today. I will look for it this evening @ home and fax it tomorrow. If I do not find it I will request a copy from the company that certified me. Call if you have any questions. (417) 839-2173.

Brandon Finn

Dear Mr. Huter:

This letter is in response to a telephone conversation with you on December 23, 2008 pertaining to the request for additional information for control #317585. As per our conversation I am requesting that nuclear density gauge model #3411 be added to line number 9A and 9B on the Materials License for Leo Journagan Construction Co., Inc.

I am also requesting that the Radiation Safety Officer for Leo Journagan Construction Co., Inc. be changed from Mike Stanley to Brandon Finn. Mike Stanley is no longer employed with Leo Journagan Construction and we would request that this change be effective immediately. I have previously been the RSO for Journagan before Mike Stanley assumed the duties and have been fully trained in the management of all of our licensed materials. I have had approximately 15 years of experience in storage, transportation, shipping, leak testing and dosimetry badge management and feel confident that I can successfully manage the duties associated with the Radiation Safety Officer. John View is the Vice President and Treasurer for Leo Journagan Construction Co., Inc. and by his signature below is also requesting that this RSO change be made immediately.

Should you have any further questions or require additional information you may contact me at (417) 839-2173. Thank you for your assistance with these issues.

Sincerely,

Brandon Finn
Quality Control Manager / RSO
