Subject: nuke plants

Importance: High

Good Day,

As a responsible citizen and nature buff, I am 100% against the permitting and building of the 2 new nuke plants by PE. We are at the edge of a new beginning in terms of energy and the environment. New technology is beckoning at our door and we must open that door to the future. Thousands of new jobs, trades and learning opportunities are enveloped in the new solar, wind, thermal and tide energies. We as a world leader must say 'NO' to the old ways of polluting our own world. Just like our bodies, we only get one. Though it is too late for us as a nation to take the lead in this environmental transition, we join the advanced nations on the correct path.

The money is not available for old ways and time is not one our side. We must act now.

Please deny any permitting, building or future advancement of any nuclear plants in Levy County or any other county in our nation.

I speak for myself and many members of our local Naturecoast Sierra Group.

Sincerely,

Theresa Waldron
