Subject: Progress Energy Levy Units 1 and 2 COLA

I am strongly opposed to Progress Energy building a nuclear power plant. Progress Energy had made little effort in developing our region's energy conservation and energy alternatives. We live in a state where solar energy is about to take hold. Progress and Levy County are in a position to set the trend for the future through the promotion of conservation and solar and wind energy. For more information go to the link below:

[CONSERVATION POWER PLANT INITIATIVE](#)

The film *Kilowatt Ours* shows the city of Austin as they built what they call an “energy conservation power plant.” Rather than build a new coal-fired power plant, the community decided it was a priority to advocate aggressive energy conservation efforts instead. After 20 years, Austin now saves more than 600 megawatts of electricity every day — one power plant worth of electricity, generated strictly from energy savings. from <http://kilowattours.org/blog/2008/11/14/conservation-power-plant-initiative/>
