I am opposed to Fermi 3 because there is no proof that nuclear energy is safe. Three Mile Island, and the debacle in Chernobyl may be merely the tips of some very dangerous "Nukebergs" in the long run.

The exorbitant costs of building another such plant will make consumers pay more for their energy. We should have learned our lesson from the costly debacle involving the creation of Fermi 1!

Adding another nuclear plants potentiates the environmental risks we already face from the first two nuclear plants.

As a citizen, tax payer and voter, I strongly oppose this effort to expand the use of nuclear technology.

Please cease and desist this outrageous plan to build Fermi 3!
