

**FEMA**

December 19, 2008

Mr. Elmo E. Collins, Jr.  
Regional Administrator  
U.S. NRC, Region IV  
612 E. Lamar Blvd, Suite 400  
Arlington, TX 76011-4005

Dear Mr. Collins:

Enclosed is a copy of the radiological emergency preparedness final report for the Grand Gulf Nuclear Station (GGNS) medical services drill evaluated on November 20, 2008. There were three Areas Requiring Corrective Action (ARCAs) corrected on the spot and one Plan Issue identified during the drill.

Based on the results of the drill, the offsite radiological emergency response plans and preparedness for the State of Louisiana and the affected local jurisdictions are deemed adequate to provide reasonable assurance that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency. Therefore, 44 CFR Part 350 approval of the offsite radiological emergency response plans and preparedness for the State of Louisiana site-specific to GGNS will remain in effect.

A copy of this report was provided electronically to Ms. Lisa Gibney, REP HQ Branch Chief and HQ Project Officer, U.S. Nuclear Regulatory Commission, in Washington, D.C. Should you have questions, please contact Lisa Hammond, Regional Assistance Committee Chair, at (940) 898-5199, or Bill Bischof, Radiological Emergency Preparedness Site Specialist, at (940) 898-5562.

Sincerely,

A handwritten signature in black ink that reads "L. Hammond".

Lisa Hammond  
RAC Chair
