Licensing Assistance Team:

Gilmore & Associates, Inc. (G&A) has enclosed with this letter the above referenced document for your approval. Due to our current and expected work load for the 2009 year, G&A will not be filing for reciprocity with the U.S. Nuclear Regulatory Commission (USNRC) for transportation and use of our nuclear density gauges in your jurisdiction. Instead, we intend to obtain a Materials License with the USNRC, to be maintained in conjunction with our existing Pennsylvania Department of Environmental Protection (PADEP) Materials License. Prior to March 31, 2008 G&A maintained a Materials License with the USNRC (number referenced above) since May 1, 1995.

As per the USNRC's direction, G&A has utilized NUREG 1556 as a guideline to complete NRC Form 313. Enclosed with this letter is Appendix B (from NUREG 1556) itemizing responses to items 5 to 11 from NRC Form 313. G&A has also enclosed a Supplemental Information Sheet giving a detailed response to Item 9: Facilities and Equipment. Specifically this response details the exact permanent storage location for our density gauges and outlines G&A's current storage and safety procedures.

If you have any questions regarding the above information please call me at (215) 345-4330 ext. 412.

Sincerely,

Gregory A. Sullivan, P.E., R.S.O.
