SUBJECT: ATC ASSOCIATES, INC.; LICENSE AMENDMENT; CONTROL NO. 143060

Dear Mr. Carty:

This refers to your license amendment request dated November 21, 2008. Enclosed with this letter is the amended license.

The amended license is written in accordance with current NRC policy and includes significant changes. Specifically, item 8 of the license specifies maximum possession limit of each radioisotope authorized on the license. These limits are specified in accordance with our telephone conversation of December 29, 2008. You must request and receive amendment to your license **prior** to acquiring material in excess of these specified limits. The NRC regulations do not have provision for an assistant RSO, therefore we can not list on a license any individual as assistant RSO. The licensee may however, designate any individual(s) to assist the named RSO in his/her tasks, but the named RSO remains responsible for implementing the licensee's radiation safety program.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 6:30 p.m. EST, Monday through Friday (except Federal holidays).
