## SUBJECT

Control No. 317583 -- Re amendment request by letter dated October 7, 2008, to change the Radiation Safety Officer for NRC License No. 21-00278-02, replacing Donald A. Daavettila with Jonathan Stone.

---

## SUMMARY

In our telephone conversations on this date, we discussed the need for providing the following additional information regarding the amendment request:

1. Please provide a document, jointly signed by yourself and a licensee management representative, confirming your appointment as the replacement Radiation Safety Office and your acknowledgement of the duties and responsibilities of that position.
2. Please briefly confirm in writing, the information you related during our conversation, about your experience and understanding of radionuclides with various types and strengths of emissions (i.e. low and high energy betas) and the differing types of instrumentation needed in performing surveys for the differing types/energies. Confirm that this training/experience was gained in both your Hazmat training and two years working/training under current RSO, Mr Daavettila, as well as the one week RSO course completed in October 2007.
3. Please clarify whether or not Donald Daavettila is to remain as a named user (in License Condition 12) of "All" material authorized for possession and use under License No. 21-00278-02.
4. Also, I related that we are now required to place on the license as amended, a total possession limit for each radionuclide authorized on the license. It was noted that possession limits are already on the license for all radionuclides except for the Ni-63 foil or plated sources authorized for use in gas chromatographs (typically 15 millicuries each. It was also noted that the possession limit could allow for replacement source(s) or planned future expansion. Mr. Stone agreed to specify a possession limit in his response for the licensee.

---

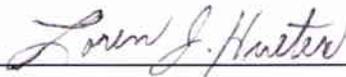

ACTION REQUIRED

License to provide response as additional information to Control No. 317583 and submit it by facsimile (630-515-1078). No follow-up hard copy needed . Also, please call me at 630-829-9829 as soon as you FAX the response.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this conversation record will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available

Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
