Subject: Support for the Proposed AREVA Uranium Enrichment Facility

Dear Ms. Reilly,

The purpose of this letter is to express our Company's support for the proposed AREVA Uranium enrichment facility.

Our Company is confident that the NRC licensing and environmental review process will adequately assure the safe design and operation of that facility. Our Company also recognizes the vital importance of the U.S. developing domestic uranium enrichment capability to support our present and future nuclear energy requirements.

Sincerely,

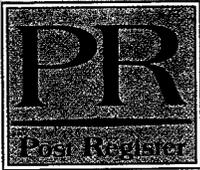

Steve Laflin
President and CEO and the 30 employees of International Isotopes Inc.

Docket 70-7015

December 8, 2008

Ms. Breeda Reilly, Project Manager
U.S. Nuclear Regulatory Commission
Washington DC 20555-0001

Dear Ms. Reilly:

We are writing to support the NRC licensing process for the new AREVA NC Eagle Rock Enrichment Facility proposed to be built in Bonneville County, Idaho Falls, Idaho. We believe that if the project can comply with the NRC permitting and license process, it will enable energy research and development to address and assist our global energy needs.

We have followed and reported on this project for many months. We believe that this project has great compatibility with the eastern Idaho research, education and workforce development institutions, specifically the Idaho National Laboratory, the Center for Energy Studies, the University systems of the University of Idaho and Idaho State University, and the Eastern Idaho Technical College.

The financial and economic impact to the local community has great potential over the upcoming years of its design, construction, and operation. Economic impact analyses have put the direct, indirect, and induced multiplier effect to be over \$5 billion over the next 30-35 years. We support the work of Grow Idaho Falls, the Greater Idaho Falls Chamber of Commerce, the Partnership for Science & Technology, and the Regional Development Alliance which led to AREVA's choice of Idaho Falls as their new corporate location.

Sincerely,

Roger Plathow

Re: AREVA // Eagle Rock Uranium Enrichment Facility

Dear NRC Members:

I write this letter to convey my strong support in favor of the licensing of AREVA's proposed Eagle Rock Uranium Enrichment Facility near Idaho Falls, Idaho.

I am a life-long resident of Idaho Falls and recognize the importance of the national interest advanced by the prompt licensing of the AREVA facility. I stress my support in favor of licensing and your prompt processing of AREVA's application on behalf of myself, my family and my professional colleagues here in Idaho Falls. Thank you for your consideration.

Sincerely,

Gregory L. Crockett
