SUMMARY

I contacted Mr. Carlson and McCormick to discuss VC Consulting's request to remove two locations of use and subsequent letter dated 9/4/08 from the Vince McCormick, RSO for license number 21-32596-01 and employee of Radiological Physics, stating that Vince wants to be removed from the license as the RSO.

After review of the close out survey data for the 2235 South Linden Road and 38800 Ryan Road locations, I determined that they could not be released for unrestricted use at this time. The results in dpm were identical for all 23 smears for both locations. It appears that the data from one site was transposed to the data for the other site.

Regarding the RSO situation, Ray stated that Vince will remain as the RSO through the transition period that VC Consulting will pursue finding replacement RSO. Vince agreed. Mr. Carlson also stated that he will contact Vineet Chada of VC Consulting to address the issue with him.

Vince will resubmit the close out survey data, and address the RSO issue and make a statement that he will remain as the RSO until VC Consulting finds a replacement.

VOID this action.
