Nuclear Regulatory Comisión

To may it concern:

03037791

The licensee Cardiohealth number 52-31320-01 in Carolina Puerto Rico is requesting an authorization to have the radiopharmaceuticals delivered to a storage room in the first floor of the building where there is only the elevator machinery located for the first daily delivery. Only the nuclear medicine technologist has access to the area and the door has two locks. We will like to have an answer as soon as possible because we are planning to start very soon with our nuclear medicine department.

Thank you for your response and orientation,

Desiree Trinidad Fornera
 Desirée M. Trinidad Fornera, CNMT
 Nuclear Medicine Technologist
