

Void Sheet

TO: License Fee Management Branch
FROM: Region 3
SUBJECT: VOIDED AMENDMENT

Control Number: 317666

Applicant: St. Francis Hospital

License Number: 24-26415-01

Docket Number: 030-32795

Date Voided: January 9, 2009

Reason for Void: The licensee requested adding accelerator produced radionuclides to the license, however, the licensee already has byproduct material authorized on their license, which includes accelerator produces radionuclides under the new definition in 10 CFR Part 30.4. Also the licensee requested adding a cobalt-57 sealed source, but again, this source is already authorized by 10 CFR 35.65, so no amendment is required. I contacted the Radiation Safety Officer, Dr. Edward Stevens and explained that accelerator produced radionuclides were included in the new definition of byproduct materials in 10 CFR 30.4 so no amendment required, because the license authorized byproduct materials. OK to void request.
