Name of Licensee: Stafford Hospital Center

Name of Participant(s): Delarosa and Simmons

Telephone No. 540-741-2028

Subject:

(NOTE: This will be used as the Documents Title in ADAMS)

This action is an application for a new license. I discussed the application deficiencies with Ms. Delarosa. The licensee was asked to submit the following information:

1. The certifying officer's Curriculum Vitae.
2. A copy of their business license.
3. A copy of the material license indicating that the proposed RSO is an authorized user for the same authorizations requested for their new license. Also, submit a written attestation, signed by a preceptor Radiation Safety Officer, that the proposed RSO has satisfactorily completed the requirements in paragraph (e) and in paragraphs (a)(1)(i) and (a)(1)(ii) or (a)(2)(i) and (a)(2)(ii) or (b)(1) or (c)(1) or (c)(2) of 10 CFR 35.50, and has achieved a level of radiation safety knowledge sufficient to function independently as a Radiation Safety Officer for a medical use licensee; and (e) Has training in the radiation safety, regulatory issues, and emergency procedures for the types of use for which a licensee seeks approval.
4. Facility diagram indicating which rooms are restricted and unrestricted as defined by 10 CFR 20.1003. Confirm that the hot lab door will be locked whenever it is unattended. Confirm that licensed material will be prepared in a shielded area (e.g., behind an L-block shield) and stored in shielding. Specify what is located above, below and adjacent to the hot lab.

Ms. Delarosa stated that the licensee is requesting a possession limit of 500 millicuries for any byproduct material permitted by 35.300
