Let Fermi 3 be built if there are NO subsidies; that is, if those who control it pay the FULL cost of construction, insurance, decommissioning, and waste "disposal". In doing so, the public must be protected by the precautionary principle; that is, it must be assumed that the worst that could happen will happen. Payments - perhaps as bonds - must fully cover that. Residents and taxpayers must not be saddled with any of the financial or other responsibility.

Richa  
Grand Rapids, Michigan
