I have no issue with the marked-up changes, it is consistent with what they asked for and I should have caught that. Are you going to issue a revised letter and SER?

Mike

Mike,

SONGS is requesting a change to the SE (in many locations), from what is in red to what is highlighted in yellow. Please see the attachment 2 for the locations. Please let me know if this change is valid and if we should issue a correction to the SE.

The licensee requests to amend the existing SCE E-plan and extend the current augmentation criteria of 60 minutes following **initial notification** to 90 minutes **after emergency classification**.

The proposed change would increase the response time goal from 60 minutes following **initiation of the callout process** to 90 minutes **following initiation of the callout process**.

Thanks

Kaly

Kaly,
As you requested, attached are two .pdf files showing
1) The words from our Augmentation Time submittal
2) Each instance where different words appear in the NRC Safety Evaluation

Please let me know if you need anything else.
