16.	IP 88066	01/16/96	_____

TRAINING: None

REMARKS: IP 95003 (Supplemental Inspection For Repetitive Degraded Cornerstones, Multiple Degraded Cornerstones, Multiple Yellow Inputs or One Red Input) has been revised to incorporate the results of the Reactor Oversight Program (ROP) safety culture lessons-learned evaluation and to respond to ROP feedback forms.

IP 95003.01 (Emergency Preparedness) has been revised to so that the Emergency Preparedness inspection guidance in IP 95001.01 be considered during the performance of all 95003 inspections.

IP 95003.02 (Guidance for Conducting an Independent NRC Safety Culture Assessment) is issued as a new attachment. Previously, most of this inspection guidance was contained within IP 95003 and its Enclosures A through F. IP 95003.02 includes guidance on performing a graded evaluation of a licensee's third party safety culture assessment, including performing an evaluation of the third-party assessment methodology and tools.

IMC 2610 (Resident Inspection Program at Nuclear Fuel Services Plant Erwin, Tennessee) has been deleted because it has been superseded by IP 88135, "Resident Inspection Program for Category I Fuel Cycle Facilities".

The following inspection manual documents, related to the chemical safety program, have been deleted. They were superseded by issuance of IMC 2600, "Fuel Cycle Facility Operational Safety and Safeguards Inspection Program," and its related elements in 2006:

IMC 2603 (Inspection of the Nuclear Chemical Process Safety Program at Fuel Cycle Facilities)

IP 88056 (Process Safety Information)

IP 88057 (Hazard Identification and Assessment)

IP 88058 (Standard Operating Procedures)

IP 88059 (Site-Wide Safety Procedures)

IP 88060 (Detection and Monitoring)

IP 88061 (Chemical Safety Training)

IP 88062 (Maintenance and Inspection)

IP 88063 (Management of Change)

IP 88064 (Emergency Response Procedures)

IP 88065 (Incident Investigation)

IP 88066 (Audits and Inspection)

DISTRIBUTION: Standard
