SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft guide in the agency's "Regulatory Guide" series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

The draft regulatory guide (DG), titled, "Quality Assurance Program Requirements (Design and Construction)," is temporarily identified by its task number, DG-1215, which should be mentioned in all related correspondence. DG-1215 is proposed Revision 4 of Regulatory Guide 1.28.

DG-1215 describes methods that the NRC staff considers acceptable for complying with the provisions of Appendix B, "Quality Assurance Criteria for Nuclear Power Plants and Fuel

Reprocessing Plants,” to Title 10, Part 50, “Domestic Licensing of Production and Utilization Facilities,” of the *Code of Federal Regulations* (10 CFR Part 50) for establishing and implementing a quality assurance (QA) program for the design and construction of nuclear power plants, fuel fabrication plants and fuel reprocessing plants.

The methods described in this revision are similar to the methods described in Regulatory Guide (RG) 1.28, “Quality Assurance Program Requirements (Design and Construction),” Revision 3, which is the previously published version of this regulatory guide. RG 1.33, “Quality Assurance Program Requirements (Operation)” addresses additional guidance for the establishment and execution of QA programs for nuclear power plants during the operations phase, which is unaffected by the revision to RG 1.28. DG-1215 endorses methods defined in American Society of Mechanical Engineers (ASME) NQA-1, “Quality Assurance Requirements for Nuclear Facility Applications.” The NRC is aware that the ASME standards committee has proposed minor changes to NQA-1 in a draft of ASME NQA-1a-2009, Addenda to ASME NQA-1-2008. If these addenda are issued in a timely manner, they will be considered for endorsement in RG 1.28, revision 4.
