SRP 17.5

The V. C Summer QAPD Part II, Subsection 13.2, describes an exception to NQA-1 1994, Subpart 3.2, Appendix 2.1, "Nonmandatory Guidance on Cleaning of Fluid System and Associated Components for Nuclear Plants." The QAPD states that only section 3 precautions are being committed to in accordance with RG 1.37 and that a suitable chloride stress-cracking inhibitor should be added to the fresh water used to flush systems containing austenitic stainless steels. Please clarify to which revision of RG 1.37 is the applicant committed to in the QAPD and also provide your justification for taking exception to RG 1.37, Regulatory Position C.3.
