CONTROL NO. 142981

Dear Dr. Schweitzer:

This refers to your license amendment request. Enclosed with this letter is the amended license. In addition to the changes to your license, this amendment also notifies you that Hot Lab No. 2 at your facility may be released for unrestricted use.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

Please note that, although requested in your letter dated November 7, 2008, we did not list certain individuals as "supervised authorized users." This is not necessary as any individual who has been trained in accordance with your application dated September 10, 2002, may be designated a user working under the supervision of any of the individuals listed in Condition No. 12 of the enclosed license. If you have any questions regarding this or other matters pertaining to your license, please contact me by phone at 404-562-4728, or by e-mail at bryan.parker@nrc.gov.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**.
