RE: NRC License No. 24-32234-01

Dear Sirs,

Due to the Missouri Department of Health and Human Services no longer regulating radioactive materials and the EPA transferring authority of NARM to the NRC, we wish to notify and amend NRC License No. 24-32234-01 to add the following radioactive materials. Please note that this amendment does not alter our current Radiation Safety Program.

| Isotope Symbol/Name | Max Qty | Chemical/Physical Form | Usage |
|---------------------|------------------------------------|--------------------------------------|--------------|
| Co-57 Cobalt 57 | as needed (not to exceed 25mCi) | Sealed Flood Source Sealed E-vial | Calibration |
| Ga-67 Galium 67 | as needed | Liquid | Diag/Imaging |
| I-123 Iodine 123 | as needed | Capsule | Diag/Imaging |
| Tl-201 Thallium 201 | as needed | Liquid | Diag/Imaging |
| In-111 Indium 111 | 10mCi | Liquid, any form | Diag/Imaging |

A copy of our Missouri License and Registration of Radioactive Materials is enclosed. PET procedures are performed via mobile PET service (Shared Medical Services); however, Shared Medical Services is responsible for NRC licensure and materials.

Thank you for your assistance.

Sincerely,

Sally Nance, CEO
Excelsior Springs Medical Center

Enclosure
