

April 11, 2007

Mr. Randy Hall
Project Manager, Licensing Branch
Division of Spent Fuel Storage and Transportation
U.S. Nuclear Regulatory Commission
6003 Executive Boulevard
Rockville, MD 20852

Dear Mr. Hall:

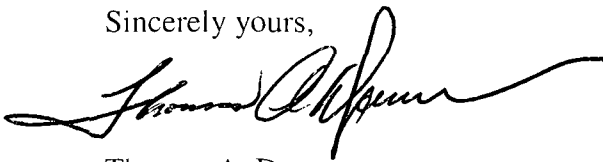

Subject: MAGNASTOR Vertical Concrete Cask Tip-Over Analysis Calculation
Docket No. 72-1031

As agreed upon in our March 29, 2007 telephone conversation, NAC International Inc. (NAC) herewith provides one hard copy and one CD of MAGNASTOR Calculation Number 71160-2005, Revision 0, for the Vertical Concrete Cask Tip-Over Analysis. Both of these items are NAC Proprietary Information and a copy of the NAC Proprietary Information Affidavit is enclosed. As you will recall, we agreed to send this proprietary information for Gordon Bjorkman's and David Tang's review prior to our resubmittal of the MAGNASTOR application.

The calculation and the CD containing the data input and output files are separately packaged in a sealed envelope and labeled as "NAC PROPRIETARY INFORMATION" for proper handling.

If you have any comments or questions, please contact me on my direct line at (678) 328-1271.

Sincerely yours,

Thomas A. Danner
Vice President, Engineering

Enclosures

**NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390**

Thomas A. Danner (Affiant), Vice President, Engineering, of NAC International, hereinafter referred to as NAC, at 3930 East Jones Bridge Road, Norcross, Georgia 30092, being duly sworn, deposes and says that:

1. Affiant has reviewed the information described in Item 2 and is personally familiar with the trade secrets and privileged information contained therein, and is authorized to request its withholding.
2. The NAC Proprietary Information to be withheld is:

Calculation Number 71160-2005, Revision 0, "NewGen VCC Tip-Over Analysis"
CD containing input and output files for Calculation Number 71160-2005, Revision 0

This information provides detailed structural stability analysis methods that have been developed by NAC and are being used for the NAC MAGNASTOR System. Therefore, this information is proprietary to NAC.

3. NAC makes this application for withholding of proprietary information based upon the exemption from disclosure set forth in: the Freedom of Information Act ("FOIA"); 5 USC Sec. 552(b)(4) and the Trade Secrets Act; 18 USC Sec. 1905; and NRC Regulations 10 CFR Part 9.17(a)(4), 2.390(a)(4), and 2.390(b)(1) for "trade secrets and commercial financial information obtained from a person, and privileged or confidential" (Exemption 4). The information for which exemption from disclosure is herein sought is all "confidential commercial information," and some portions may also qualify under the narrower definition of "trade secret," within the meanings assigned to those terms for purposes of FOIA Exemption 4.
4. Examples of categories of information that fit into the definition of proprietary information are:
 - a. Information that discloses a process, method, or apparatus, including supporting data and analyses, where prevention of its use by competitors of NAC, without license from NAC, constitutes a competitive economic advantage over other companies.
 - b. Information that, if used by a competitor, would reduce their expenditure of resources or improve their competitive position in the design, manufacture, shipment, installation, assurance of quality or licensing of a similar product.
 - c. Information that reveals cost or price information, production capacities, budget levels or commercial strategies of NAC, its customers, or its suppliers.

NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390
(continued)

- d. Information that reveals aspects of past, present or future NAC customer-funded development plans and programs of potential commercial value to NAC.
- e. Information that discloses patentable subject matter for which it may be desirable to obtain patent protection.

The information to be withheld is considered to be proprietary for the reasons set forth in Items 4.a, 4.b. and 4.e.

- 5. The information to be withheld is being provided to the NRC in confidence.
- 6. The information sought to be withheld, including that compiled from many sources, is of a sort customarily held in confidence by NAC, and is, in fact, so held. This information has, to the best of my knowledge and belief, consistently been held in confidence by NAC. No public disclosure has been made, and it is not available in public sources. All disclosures to third parties, including any required transmittals to the NRC, have been made, or must be made, pursuant to regulatory provisions or proprietary agreements, which provide for maintenance of the information in confidence. Its initial designation as proprietary information and the subsequent steps taken to prevent its unauthorized disclosure, are as set forth in Items 7 and 8 following.
- 7. Initial approval of proprietary treatment of a document/information is made by the Vice President, Engineering, the Project Manager or the Director, Licensing – the persons most likely to know the value and sensitivity of the information in relation to industry knowledge. Access to proprietary documents within NAC is limited via “controlled distribution” to individuals on a “need-to-know” basis. The procedure for external release of NAC proprietary documents typically requires the approval of the Project Manager based on a review of the documents for technical content, competitive effect and accuracy of the proprietary designation. Disclosures of proprietary documents outside of NAC are limited to regulatory agencies, customers and potential customers and their agents, suppliers, licensees and contractors with a legitimate need for the information, and then only in accordance with appropriate regulatory provisions or proprietary agreements.
- 8. NAC has invested a significant amount of time and money in the research, development, engineering and analytical costs to develop the information that is sought to be withheld as proprietary. This information is considered to be proprietary because it contains detailed descriptions of analytical approaches, methodologies, technical data and evaluation results not available elsewhere. The precise value of the expertise required to develop the proprietary information is difficult to quantify, but it is clearly substantial.

**NAC INTERNATIONAL
AFFIDAVIT PURSUANT TO 10 CFR 2.390
(continued)**

9. Public disclosure of the information to be withheld is likely to cause substantial harm to the competitive position of NAC, as the owner of the information, and reduce or eliminate the availability of profit-making opportunities. The proprietary information is part of NAC's comprehensive spent fuel storage and transport technology base, and its commercial value extends beyond the original development cost to include the development of the expertise to determine and apply the appropriate evaluation process. The value of this proprietary information and the competitive advantage that it provides to NAC would be lost if the information were disclosed to the public. Making such information available to other parties, including competitors, without their having to make similar investments of time, labor and money, would provide competitors with an unfair advantage and deprive NAC of the opportunity to seek an adequate return on its large investment.

STATE OF GEORGIA, COUNTY OF GWINNETT

Mr. Thomas A. Danner, being duly sworn, deposes and says:

That he has read the foregoing affidavit and the matters stated therein are true and correct to the best of his knowledge, information and belief.

Executed at Norcross, Georgia, this 11th day of April 2007.

Thomas A. Danner
Vice President, Engineering
NAC International

Subscribed and sworn before me this 11th day of April, 2007

Notary Public
