To: NRCExecSec Resource
Subject: Questions about a possible Nuclear Energy Plant
Attachments: County Map.pdf

To Whom It May Concern:

The Wayne County Utah Commission would like to offer a possible location for a Nuclear Energy Plant. We are located in South Central Utah and have undeveloped water rights, along with be adjacent to a Uranium mine.

We understand that Utah doesn't have a Nuclear Energy Plant and could become a home to one in the future. I just recently attended a meeting through the Utah Alliance Committee where the legislature spoke on the future of Utah and Nuclear Energy being one of the top priorities for clean energy.

The Wayne County Commission has contemplated a Nuclear Energy Plant for a few years now...and are just coming to the realization that it could be a reality and also an actual advantage for an environmental proposal. "Clean Energy" being the hot topic for the future, could help the decision, a proposal of this caliber could cause an equal outcome of attitudes for all involved.

A Nuclear Energy Plant could help our area in Economic growth along with being able to develop water that is not being used. Wayne County consists of 1,591,040 acres, of which 85% is federal land, 11% is state land, and just slightly over 3 % is privately held. So if you were to take a look at your arm from your shoulder to the tip of your longest finger...it would represent Wayne County...then take a look at the top joint of your little finger...that is the how much privately owned land there is in Wayne County, very small isn't it. Resource decisions and issues that affect the federal lands have a major impact on the people in the county. A Nuclear Energy Plant could really help Wayne County in the natural resource areas along with improving Economic Growth. Please consider us when looking for possible locations for a Nuclear Energy Plant in Utah.

Enclosed: Attachment map of Wayne County...the proposed location would be in the Caineville/Hanksville area.

Thank you for your time!

Sincerely,

Michelle
