Dr. Kunze,

Please find attached a outline of the SNM portion of draft regulatory guide 5.59. Barry Wray sent this to me to forward to ISU. The attachment is not a formal document, only some guidance for your use in preparing the physical security portion of the application. If you have questions, call me or Barry Wray (301-415-0232).

**IMPORTANT:** The attachment has regulatory material in the front. This gives you the regulatory basis for NRC requiring the information. When you put pen to paper, the material that you will actually use is the table of contents. Include ALL of the sections from the table of contents, even the sections that are not applicable to ISU. When not applicable, so indicate; state the section title and make a brief statement, for example, xxx is not applicable to ISU because .... This way, the reviewer will know that you did not unintentionally leave something out and have to ask a question later on.

I will be formally writing about my conversation this morning to extend the submittal date to Friday, February 27, 2009. In the meantime:

- Organize the physical security section according to the draft outline. Check for consistency between this other sections.
- Be specific, avoiding vague language such as "various places".
- Discuss all material (including foils).
- Be careful about rounding numbers (be consistent and avoid rounding up if this brings you into another regulatory regime).

Call either Barry or myself.

Regards,

Chris
