

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

February 5, 2009

LICENSEE: Southern California Edison Company

FACILITIES: San Onofre Nuclear Generating Station, Units 2 and 3

SUBJECT: SUMMARY OF JANUARY 15, 2009, CLOSED MEETING WITH REPRESENTATIVES OF SOUTHERN CALIFORNIA EDISON COMPANY RE: SAN ONOFRE NUCLEAR GENERATING STATION, UNITS 2 AND 3 (TAC NOS. MD9963 AND MD9964)

On January 15, 2009, the U.S. Nuclear Regulatory Commission (NRC) Office of Nuclear Reactor Regulation (NRR) and the Office of Nuclear Security and Incident Response (NSIR) staff had a closed meeting with representatives of Southern California Edison, licensee for San Onofre Nuclear Generating Station (SONGS). The licensee requested the meeting to discuss its proposed physical security plan changes during the upcoming steam generator replacement outages at SONGS, expected impacts and temporary security measures, and implementation schedule with phased approvals. The licensee indicated that the proposed changes are expected to last for a period of 21 months, from June 2008 to February 2010, and that portions of the changes may need to be processed under a license amendment request (Section 50.90 of Title 10 of the *Code of Federal Regulations* (10 CFR)), and the rest under 10 CFR 50.54(p). In a subsequent telephone call, the NRC staff informed the licensee that, in accordance with 10 CFR 2.102(a), the NRC staff's acceptance review, required by NRR Office Instruction, LIC-109, "Acceptance Review Procedures," is performed on applications requesting approval of a proposed action to determine if there is sufficient information in scope and depth to allow the NRC staff to complete its detailed technical review.

The Enclosure contains the list of attendees at the meeting. No written materials were prepared or distributed by the NRC staff for this meeting.

A handwritten signature in black ink, appearing to read "N. Kalyanam".

N. Kalyanam, Project Manager  
Plant Licensing Branch IV  
Division of Operating Reactor Licensing  
Office of Nuclear Reactor Regulation

Docket Nos. 50-361 and 50-362
