Comments submitted from Dolores Leonard, 2192 Bassett, Detroit 48217

Monroe, Michigan is just down the road from Detroit, Michigan. For years I read about Fermi reactors. What I remember most is that they were and still are dangerous to human life. It is a nuclear power plant.

I live in a community that has been bombarded by an oil refinery, a salt mine, a city-owned waste treatment facility and a compost facility.

No one can tell me that none of these facilities do not do physical, psychological and monetary harm to citizens.

Coal is not clean. Nuclear energy/waste is not safe.

Why the rush? Money?

Why not wait to see what programs President Obama can implement with wind and solar? Both are probably less expensive, less harm to human and animals alike. There is a thinking these days about renewable energy and energy efficiency.

Fermi 3? What happened to Fermi 1 and Fermi 2? Anything that is radioactive is not good for any community.

A Good Credit Score is 700 or Above. [See yours in just 2 easy steps!](#)
