Dear Mr. Carr,

I left you two voice mail messages regarding your recent amendment request to open sealed sources. Opening and removing sources requires explicit training and experience. Your request notes that you will follow a Work Plan. We will need to see your Work Plan, operating and emergency procedures, a discussion about dosimetry (external and internal), etc. Please note that SABIA opened sources and this is what happened:

http://adamswebsearch2.nrc.gov/idmws/doccontent.dll?library=PU_ADAMS^PBNTAD01&ID=090300307

The safety of your employees is paramount to us. We need to ensure a safe working environment with trained and experienced personnel. As such, we need time to review your action. Your action is being assigned to Mr. John Nicholson. Unfortunately, with our current work load, we cannot begin a proper review until the last week of February. When Mr. Nicholson has reviewed your request, he will contact you. You can take this time to consider the above information.

Mr. Nicholson can be reached at: 610.337.5236 and John.Nicholson@nrc.gov

Thank you very much.

Kathy Modes
