Chris,

I am traveling all week, Ted has one more question to address. I would expect to have something back to the DOT by the first of next week.

John

John,

I am looking into your Microshield question.

For NRC scheduling purposes, when does International Isotopes expect to get something to DOT/NRC?

Chris,

They believe they will have something to me by the end of the week. I was wondering if I could get copies of the Microshield calculations that the NRC did for the cask. I would like to run some myself but want to use the same parameters. If Mike can print the Microshield results as a pdf and forward them to me that would be great. I would then run calc reducing the activity to achieve a dose rate that would result in less than 200 mr/hr on-contact with the cask.

I also have some custom materials loaded into my software. Co-60 pellets being one of them that I use as the source material.

Thanks

John

John/Mike,

To support NRC planning, please forward a schedule for when you will be submitting a resolution to NRC RAI's. An email is appropriate.

Thanks,

Chris Staab
