U.S. Nuclear Regulatory Commission
Office of International Programs
Washington, D.C. 20555-0001
Attn: Stephen Baker

Mr. Baker,

This letter is a formal request that our application for the export of a radioactive source to Falcon Wireline in Oman be withdrawn. The reason for the withdrawal is that we have learned that the commodity to be exported was eligible for export under the NRC General license authority, not requiring a special license.

Thank you in advance for your attention to this matter and we look forward to working with your office on subsequent applications for special licensing.

Phil Phelps
Radiation Safety Officer
Probe Technology Services inc.
