General Comment

Thank you for this opportunity to comment.

I am writing in regard to "Detroit Edicson Company Fermi Nuclear Power Plant, Unit 3 combined License Application Notice of Intent to Prepare an Environmental Impact Statement and Conduct Scoping Process (Docket ID NRC-2008-0566)

I am particularly concerned about the health risks of nuclear power. How can you assure us that building of Fermi III is safe for us and especially for our pregnant mothers and their unborn children?

Scientific research tells us that there are no safe levels of exposure to radioactive substances.

Can you assure us that the building of a new nuclear power plant will not impact in a negative way the health of our citizens.
