General Comment

I am writing in regard to "Detroit Edison Company Fermi Nuclear Power Plant, Unit 3 Combined License Application Notice of Intent to Prepare an Environmental Impact Statement and Conduct Scoping Process" (Docket ID NRC-2008-0566)

I am concerned about the ongoing problem of storing nuclear waste.

President Obama has indicated that he will withdraw the liscence to operate the facility at Yucca Mountain. How will the industry and the Department of Energy deal with the safe long-term storage of nuclear waste? Temporary storage of the waste on site is unacceptable.

Unless there is a fail-proof facility to store thousands of tons of waste that has already been generated, building a new nuclear power plant would be a waste of money. This issue is not only a concern to me. It is a concern to the people in Monroe and all of Michigan for years to come. I hope that as a government agency, you will carry out your responsibility for enforcing regulations in this manner.

Thank you for the opportunity to voice my concerns.
