General Comment

I am writing in regard to "Detroit Edison Company Fermi Nuclear Power Plant, Unit 3 Combined License Application Notice of Intent to Prepare an Environmental Impact Statement and Conduct Scoping Process (Docket ID NRC-2008-0566). In my opinion, investment in the nuclear industry is money that could have gone to producing cheap renewable electricity like wind, solar, and geothermal power, not to mention conservation and efficiency efforts. Besides their lower costs for construction and operation, investments in conservation, efficiency, and renewable energy provide ongoing jobs for solar-panel installation, retrofitting buildings that are leaking energy, wastewater reclamation, materials reuse and recycling and much more.

Please keep the above comments in mind as you consider DTE's application to build a new nuclear power plant in Monroe. Thank you for this opportunity to comment in this important matter.

Sincerely,
Jean Ann Campana, I.H.M.
