Subject: Comment: Nuclear Waste - The Roy Process

Letter to the Editor,

Moving nuclear waste from place to place is not "clean-up"! Obviously you still have it and will come back to you in your food, water and atmosphere!

Nothing will contain nuclear waste. It will continue to generate heat and has leaked out in the first 63 years of the atomic age. The first atom bomb "test" was in 1945. More than 528 atmospheric tests have been exploded. No one is immune.

Global warming is being used as an excuse for many agendas. The longest lived polluting agent is nuclear power. Comparing mortality will not make you less dead! Don't be fooled again!

The aim of nuclear power is to make plutonium 239 for atom bombs and create the BIG STICK of political might. Electricity is made from the heat which makes steam and turns the electric turbines. The trick is to make you pay for your own doomsday!

Nuclear terms are designed to confuse the public mind. Nuclear waste...is not waste! Spent fuel....is not spent, but actually more radioactive coming out than going in as fresh fuel. Depleted uranium ordinance is illegal under the Geneva Convention and etc.

There is 'off the shelf' science that can reduce plutonium 239 to zero radioactivity and produce electricity from the heat. In 1979, after the Three Mile Island accident, Dr. Radha R. Roy invented the Roy Process for neutralizing nuclear waste . It became an AP world wide news story.

Then president Ronald Reagan signed, "The 1982 Nuclear Waste Policy Act" which made geologic

Template = SECY-067

isolation federal law! This put alternatives like cost effective photon transmutation in limbo.

All one can do now is not build any more nuclear power reactors, and photon transmute to zero the so-called nuclear waste. This would both neutralize the waste and create electricity from the heat. Eliminating nuclear waste guarantees international security.

Albert Einstein once said, "Nuclear power is one hell of a way to boil water".

Regards,
Dennis F. Nester

Chernobyl 20th Anniversary Pictures

NukeNet Anti-Nuclear Network (nukenet@energyjustice.net)
WARNING! Contains Graphic Pictures! Not For the Faint of Heart!

The church bells in the Ukraine are ringing in remembrance of Chernobyl..
Every member of Congress should watch the following film before authorizing another nuclear power plant. Click play after the first few pictures.
