Subject: Reduce nuclear waste by not producing it!

Nuclear Regulatory Commission

Rockville, MD
US

Dear Nuclear Regulatory Commission,

My understanding of the nuclear waste problem is that there's only one reliable way to reduce it: stop producing it. Everything I've read indicates that there's just no safe way to handle the stuff at this time.

From what I've read, the sensible action for now is to stop creating the waste until (if ever) a carefully researched and permanent disposal program can be put in place.
