SUBJECT: TERMINATION OF YOUR NRC RADIOACTIVE MATERIALS LICENSE

Dear Ms. Buch:

In the request by letter received November 14, 2008, (dated April 10, 2008) and by a facsimile dated February 6, 2009 and February 9, 2009, (received February 9, 2009) you requested that we terminate your NRC radioactive material license, License Number 24-24859-01 (expiration date of September 30, 2012). The subject license authorized possession and use of any byproduct material permitted by 10 CFR 35.100 and 35.200 at your facility located at 500 Medical Drive, Wentzville, Missouri. The NRC staff has reviewed the information you provided documenting the final disposition of these materials. Following the disposition of all licensed materials you performed a survey consisting of both direct radiation and wipe test measurements, of both restricted and unrestricted areas, which demonstrated that the facility meets NRC release criteria.

Based on this information, no further remediation or actions with respect to NRC regulated material is required and we conclude that your licensed facility meets NRC criteria for release for unrestricted use and termination of NRC License Number 24-24859-01. Accordingly, an amendment is enclosed, terminating your NRC License Number 24-24859-01, as requested.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public
