ORGANIZATION

NAC International

SUBJECT

Boral testing during fabrication of MAGNASTOR casks

SUMMARY (Continue on Page 2)

NRC Participants: Eric Benner, Shana Helton

**Purpose of call:** Discuss regulatory options for amending certificate of compliance (CoC) 72-1031 to reduce the testing requirements of the Boral neutron absorber.

**Discussion:** The NRC indicated that if NAC submitted an amendment that solely addressed the Boral testing requirements, the schedule would be commensurate with a priority 4, moderate complexity case: 6.4 months of technical review (assuming that the staff had no need to request additional information), followed by 6 months of rulemaking. NAC thanked the NRC for the information and stated that they would communicate their plans for an amendment to CoC 72-1031 after making their decision.

END OF CONVERSATION RECORD - NO CONTINUATION ON PAGE 2.
