Re: License Number 45-25313-01

Dear Dr. Lodhi:

This is to mention that Chi Associates has designated Boyd Richardson, currently a senior inspector, to be Nuclear Safety Officer. He will proceed to receive all the necessary training before taking over the position.

Chi Associates does not have a nuclear gage in its possession, and will not own one until a Nuclear Safety Officer is fully trained and qualified to supervise its use.

Currently Chi Associates' inspectors are not working on any nuclear gages, nor do they perform any tests in this area. The inspectors will not perform work related to nuclear gage until a fully trained and qualified officer is on duty.

Please contact me if you have questions. Thank you very much.

Sincerely,

Lotta Chi
